

Lifelong learning and why it's important

Knowledge can be acquired and skill-sets developed anywhere – learning is unavoidable and happens all the time. However, lifelong learning is about creating and maintaining a positive attitude to learning both for personal and professional development.

Lifelong learners are motivated to learn and develop because they want to:

it is a deliberate and voluntary act.

Lifelong learning can enhance our understanding of the world around us, provide us with more and better opportunities and improve our quality of life.

- Certifications available
- Learning paths
- Detailed breakdown of skills expected
- Book an Exam

The screenshot shows the Microsoft Learn Certifications page. The header includes the Microsoft Learn logo and the title 'Microsoft Certifications'. Below the header, there is a navigation bar with a 'Go to Certification Dashboard' button. The main content area is a grid of certification paths, each with an icon, a title, and a brief description. The paths include Developer, Administrator, Solution Architect, Data Engineer, Data Scientist, AI Engineer, DevOps Engineer, Security Engineer, and Functional Consultant. Below the grid, there is a section titled 'Become Microsoft Certified' which provides more details about the certification process and lists three categories: Fundamentals certifications, Role-based certifications, and Additional certifications. Each category has a brief description and a link to the relevant certification path.

Microsoft Certifications

Earn certifications that show you are keeping pace with today's technical roles and requirements. Select a job role to discover certification paths.

[Go to Certification Dashboard](#)

 Developer Developers design, build, test, and maintain cloud solutions.	 Administrator Administrators implement, monitor, and maintain Microsoft solutions.	 Solution Architect Solutions architects have expertise in compute, network, storage, security.
 Data Engineer Data engineers design and implement the management, monitoring, security, and privacy of data using the full stack of data services.	 Data Scientist Data scientists apply machine learning techniques to train, evaluate, and deploy models that solve business problems.	 AI Engineer AI engineers use Cognitive Services, Machine Learning, and Knowledge Mining to architect and implement Microsoft AI solutions.
 DevOps Engineer DevOps engineers combine people, process, and technologies to continuously deliver valuable products and services that meet end user needs and business objectives.	 Security Engineer Security engineers implement security controls and threat protection, manage identity and access, and protect data, applications, and networks.	 Functional Consultant Functional consultants leverage Microsoft Dynamics 365 and Microsoft Power Platform to anticipate and plan for customer needs.

Become Microsoft Certified

Microsoft has certification paths for many technical job roles. Each of these certifications consists of passing a series of exams to earn certification.

Fundamentals certifications	Role-based certifications	Additional certifications
Recommended start. Ideal for individuals just starting in technology or thinking about a career change.	Choose a role-based certification to begin learning valuable job role skills.	Explore specialty, Microsoft Certified Educator, and Microsoft Office technical certifications.
 Fundamentals Certification Microsoft Certified: Azure Fundamentals	 Associate Certification Microsoft Certified: Azure Developer Associate	 Expert Certification Microsoft Certified: Azure for SAP Workloads Specialty

Microsoft Certification Azure Fundamentals

Microsoft Certified: Azure Fundamentals

Whether you're new to the field or a seasoned professional, mastering the basics in Microsoft Azure can help you jump-start your career and prepare you to dive deeper into the many technical opportunities Azure offers.

The certification validates your basic knowledge of cloud services and how those services are provided with Azure. Candidates should be able to demonstrate a fundamental knowledge of cloud concepts, along with Azure services, workloads, security, privacy, pricing, and support.

The Microsoft Certified: Azure Fundamentals certification could be a great fit for you if you'd like to:

- Prove your knowledge of cloud computing concepts, models, and services, such as public, private, and hybrid cloud, in addition to infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS).
- Show your expertise on how Azure supports security, privacy, compliance, and trust.

It is recommended to have familiarity with concepts of networking, storage, compute, application support, and application development. You can use your Azure Fundamentals certification to reinforce your basics for other Azure role-based or specialty certifications, but it isn't a prerequisite for any of them.

To ensure you are prepared for the exam, we recommend:

- Fully understanding the [skills measured](#).
- Studying the relevant [self-paced content](#) on Microsoft Learn, or attending a [Microsoft Azure Virtual Training Day: Fundamentals](#), or signing up for an [instructor-led training event](#) with a Microsoft Learning Partner.
- Taking the [practice exam](#) to validate your knowledge and understanding of the exam experience.
- Get a trial subscription and give it a try.
- Checking out [Master the basics with the Azure Fundamentals certification](#) to learn more about this certification and how to get ready.

What's next?

Register for your exam! After you pass the exam and earn your certification, celebrate your certification badge and skills on social platforms such as LinkedIn. To find out more, visit: [use and share certification badges](#).

Depending on your goals, you may choose to master the basics with the Azure Data Fundamentals certification or the Azure AI Fundamentals certification. Or [find the right Microsoft Azure certification for you](#), based on your profession (or the one you aspire to).

Important

The English language version of this certification was updated on January 25, 2022. Please download the skills measured document on the [Exam AZ-900 page](#) to see what changed.

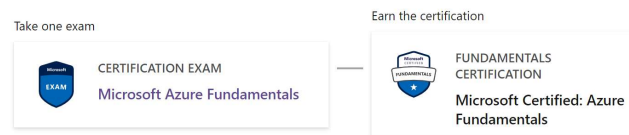

Job role: Administrator, Business User, Developer, Student, Technology Manager

Required exams: AZ-900

Important: [See details](#)

Microsoft Free (Virtual) Training Days

Microsoft Azure Virtual Training Day: Fundamentals

30th March 2022, 10:00-12:10 (BST)
31st March 2022, 10:00-12:30 (BST)

Delivery Language: English
Closed Captioning Language(s): English

Join us at Microsoft Azure Virtual Training Day: Fundamentals for an introduction to cloud computing concepts, models and services – from public to private to hybrid cloud. You'll also learn the basics of Infrastructure-as-a-Service (IaaS), Platform-as-a-Service (PaaS) and Software-as-a-Service (SaaS). Prepare to take full advantage of the key Azure pillars of security, privacy, compliance and trust.

Who should attend:

- Developers
- Architects
- IT professionals
- Cloud novices

Technical level: For those who are just beginning to work with cloud-based solutions and services or are new to Azure.

After completing this training, you will be able to:

- Prepare for cloud migration with the training to evaluate your existing on-premises environment.
- Optimise your Azure-based workloads for maximum ROI.
- Learn best practices for managing your virtual machines, applications and data with Azure.
- Take the [Microsoft Azure Fundamentals certification exam](#) at no cost.

Here's what you can expect:

Part 1	Part 2
Introduction	Introduction
Azure Cloud Concepts	Azure Security and Network Security
Core Azure Services	Identity, governance, privacy and compliance
Break: 10 Minutes	Break: 10 Minutes
Azure Solutions and Management Tools	Azure Pricing and Lifecycle
Closing Question & Answer	Closing Question & Answer

Space is limited, so reserve your spot now!

[Click here](#) for the Microsoft digital event code of conduct.

For questions about discounted exam eligibility, scheduling or expirations, please refer to [the FAQ](#).

Microsoft Azure Virtual Training Day: Fundamentals event, including the exam upon completing the event, is open to the public and offered at no cost. Prior to registering for this training, government employees must check with their employers to ensure their participation is permitted, and in accordance with, applicable policies and laws.

Microsoft 30 days to learn it skills challenge (50% off exam voucher!)

<https://developer.microsoft.com/en-us/offers/30-days-to-learn-it?>

Master the most in-demand skills and advance your career

30 Days to Learn It can help you build skills and start your preparation for Microsoft Certifications for AI, DevOps, Microsoft 365, low code, IoT, data science, cloud development, and more. Select your challenge below, work through learning modules, and exchange ideas with peers through a global community forum.

Microsoft 30 days to learn it skills challenge (50% off exam voucher!)

<https://developer.microsoft.com/en-us/offers/30-days-to-learn-it?>

Azure Virtual Desktop Fundamentals

Gain the ability to plan the architecture for an Azure Virtual Desktop deployment, manage access and security, manage user environments and apps, and monitor and maintain an Azure Virtual Desktop environment.

Get started

Azure AI Fundamentals

Get a solid foundation in machine learning and AI concepts including computer vision, natural language processing, and conversational AI. This learning journey is designed for participants with both technical and nontechnical backgrounds.

Get started

Microsoft 365 Developer

Design, build, test, and maintain apps and solutions with Microsoft 365, Microsoft Teams, Microsoft Identity, and Microsoft Graph. Customize solutions to increase productivity and collaboration.

Get started

Build apps with Microsoft Graph

Microsoft Graph is the gateway to data and intelligence in Microsoft 365. It allows a programmability model to access the data in Microsoft 365, Windows 10, and Enterprise Mobility + Security. Use Microsoft Graph to build apps for organizations and consumers that interact with millions of users.

Get started

Azure Solutions Architect

Discover how to use Azure Infrastructure to improve your applications and become an Azure Solution Architect. Advise stakeholders and translate business requirements into cloud solutions.

Get started

Java on Azure Developer

Start developing modern Java applications in the cloud with managed compute, databases, and DevOps services. This learning journey is designed for participants with familiarity developing and running Java applications and beginner-level experience with cloud infrastructure.

Get started

Azure Developer

Participate in all phases of cloud development to create end-to-end solutions. Design, build, test, and maintain cloud applications using compute, storage, management, and security services on Azure.

Get started

Power Platform App Maker

Build solutions including apps, AI, and reporting with low code and configuration. Simplify, automate, and transform tasks and processes using the Microsoft Power Platform.

Get started

Azure Data Scientist

Design and implement a data science solution on Azure. Learn how to build machine learning models, no-code predictive models, and ML solutions, and run data science workloads in the cloud.

Get started

DevOps Engineer

Design and implement DevOps processes and practices. Develop an instrumentation strategy with logging, telemetry, and monitoring. Manage source control with GitHub to foster collaboration and automate build and deployment processes.

Get started

Azure Synapse Analytics

Take your data analytics skills to the next level with Azure Synapse Analytics. Learn how to integrate, transform, and consolidate data from various structured and unstructured data systems into structures that are suitable for building analytics solutions.

Get started

Microsoft 30 days to learn it skills challenge (50% off exam voucher!)

<https://developer.microsoft.com/en-us/offers/30-days-to-learn-it?>

MICROSOFT CLOUD SKILLS CHALLENGE

Microsoft Ignite Cloud Skills Challenge | November 2021

Earn a free Microsoft Certification exam while learning new skills.

Learn...and get rewarded

Complete one challenge and earn a free Microsoft Certification exam

There are 12 challenges available to choose from, select one that's right for you. Once you complete that challenge you will earn a free Microsoft Certification exam that can be applied to your choice from a select list of options.

The challenge ends on November 30, 2021 at 4:00 PM UTC (16:00). Make sure all modules in your challenge are complete before time runs out.

If you complete your challenge before it ends, one Microsoft Certification exam will be associated with your Learn profile on December 7, 2021. You will be notified via email when it becomes available.

To see the full list of eligible exams please refer to the [official rules](#) page for more details.

Reminder: No matter how many Microsoft Ignite Cloud Skills Challenges you complete you can only earn one free Microsoft Certification exam.

Share your achievements and engage with us on social using [#CloudSkillsChallenge](#)

Have questions? Find answers in the challenge [FAQs](#).

Microsoft Ignite Skills Challenges (Expired 😞)

- **Teams Admin Challenge**

This challenge is for professionals who manage Microsoft Teams to facilitate efficient and effective collaboration and communication in a Microsoft 365 environment.

- **Teams Voice Engineer Challenge**

If you're a telecommunications professional that knows how to plan, design, configure, maintain, and troubleshoot an integrated communications solution using Microsoft Teams, this challenge and certification can help you move your career forward.

- **Desktop and Device Management Challenge**

This challenge is for Modern Desktop Administrators who deploy, configure, secure, manage, and monitor devices and client applications in an enterprise environment.

- **Dynamics 365 Sales Consultant Challenge**

If you're a functional consultant, a professional working with Microsoft Dynamics 365 Sales, or a developer looking to hone your consulting skills, this challenge could help give your career a boost by showing that you can use Dynamics 365 Sales to empower the sales force.

- **Dynamics 365 Supply Chain Management Challenge**

Analyze business requirements and translate those requirements into fully realized business processes and solutions that implement industry best practices in this challenge. Learn how to serve as a key resource in implementing and configuring applications to meet business requirements.

- **Power Platform Developer Challenge**

If you have a passion for designing, developing, securing, and extending Microsoft Power Platform solutions, this certification could be for you. You'll learn how to create technical designs and Power Apps, extend the platform and the user experience, and develop integrations.

- **Azure Admin Challenge**

Want to know Azure even more? Take this challenge to learn skills that help you implement, manage, and monitor an organization's Microsoft Azure environment.

- **Azure Developer Challenge**

This challenge is for developers interested in designing, building, testing, and maintaining cloud applications and services on Microsoft Azure.

- **Azure Database Admin Challenge**

This challenge is for professionals who implement and manage the operational aspects of cloud-native and hybrid data platform solutions built with Microsoft SQL Server and Microsoft Azure Data Services.

- **Windows Server Hybrid Admin Challenge**

This challenge is for anyone looking to grow expertise in configuring and managing Windows Server on-premises, hybrid, and infrastructure as a service (IaaS) platform workloads.

- **Security Operations Analyst Challenge**

Take this challenge if your career goal is to reduce organizational risk by rapidly remediating active attacks in the environment, advising on improvements to threat protection practices, and referring violations of organizational policies.

- **Identity + Information Protection Challenge**

This challenge is for the multi-talented security experts. Learn how to design, implement, and operate an organization's identity and access systems. And learn how to plan and implement controls that meet organizational compliance needs.

Microsoft Ignite Skills Challenges (Expired 😞)

Eligible exams include only those listed below.

By Topic	Exams
Azure	AZ-104: Microsoft Azure Administrator AZ-204: Developing Solutions for Microsoft Azure DP-300: Administering Relational Databases on Microsoft Azure AZ-800: Administering Windows Server Hybrid Core Infrastructure AZ-801: Configuring Windows Server Hybrid Advanced Services
Dynamics 365	MB-210: Microsoft Dynamics 365 Sales MB-330: Microsoft Dynamics 365 Supply Chain Management
Microsoft 365	MD-100: Windows 10 MD-101: Managing Modern Desktops MS-700: Managing Microsoft Teams MS-720: Microsoft Teams Voice Engineer
Power Platform	PL-400: Microsoft Power Platform Developer
Security, Compliance, and Identity	SC-200: Microsoft Security Operations Analyst SC-300: Microsoft Identity and Access Administrator SC-400: Microsoft Information Protection Administrator

- **Important dates:**
- **Challenge Starts:** November 2, [2021](#) at 4:00 PM UTC
- **Challenge Ends:** November 30, [2021](#) at 4:00 PM UTC
- **Vouchers sent:** If you complete your challenge before it ends, one free Microsoft Certification exam will be associated with your Learn profile on *December 7, 2021*.
